Abstract of JP9138827

PROBLEM TO BE SOLVED: To guarantee the right and the advantage of a person having copyright by ciphering a specified restored object by means of a provided device and decoding ciphered data, judging use propriety and restoring and reproducing original data by means of a use device. **SOLUTION:** A circulation center device 10 reduces information quantity to a degree that a content can be recognized based on original data 1 registered by a writings supplier and generates distribution data 3. A program 41 for restoring distribution data 3 to original data 1, difference data 42 being a difference between original data 1 and distribution data 3 and a use condition 43 are made into a capsule as the restored object 40 and it is transmitted as ciphered data 52. The user device 70 decodes ciphered data 52 and judges use propriety and use authority based on the use condition 43 in the restored object 40. The restoration program 41 is executed based on a judged result and restored original data 1 is reproduced.
